

Muhammad Mustajab Ali

Principal Software Engineer

mustajab90@gmail.com · +92 309 5140119 · Lahore, Pakistan

Summary

Principal Software Engineer with 10+ years building Java and Spring Boot systems for payment processing. At i2c inc., works across money movement and risk: MoneyGram, international funds transfer, ACH and fraud. Combines hands-on development with quality consulting, plus side projects in Django, Angular, Android and real-time streaming.

Experience

Principal Software Engineer — i2c inc. · January 2018 – Present · Lahore, Pakistan

- Develop Java and Spring Boot services for a global payment processing platform.
- Serve as Quality Consultant alongside development, owning quality across key product areas.
- Domains: ACS, ICM, MoneyGram, International Funds Transfer, ACH and Fraud.

Software Engineer — i2c inc. · June 2013 – August 2014 · Lahore, Pakistan

- Built new services and integrated external hosts into the payment processing platform.
- Maintained production services in a J2EE environment.
- Tools: MyEclipse, Apache Tomcat, SVN.

Software Engineer — Techlogix · July 2012 – June 2013 · Lahore, Pakistan

- Developed and maintained use cases in a J2EE-based ERP and business solutions product.
- Tools: IntelliJ IDEA, Oracle Database, jQuery UI, SVN.

Intern — Ebryx · June 2010 – July 2010 · Lahore, Pakistan

- Tested Asterisk, an open-source telephony platform.
- Installed a whiteboard plug-in for Trac, a bug-tracking system.

Selected Projects

Naatsify — Naat streaming app · 2026

- Spotify-style streaming app for naats.
- Implemented JWT and JWE for secure authentication, and WebRTC for real-time communication.

Web Crawler · April 2016 – 2017

- Crawls warez sites and reports copyright violations.
- Stack: Angular 2, Django, Scrapy, PostgreSQL.

Android Game · January 2012 – June 2012 · Lahore, Pakistan

- Built a 2D Android game using AndEngine, an open-source 2D game engine.
